

IIoT – Smart Platform Manufacturing Discrete, Injection Mould, Press Tool

Vegam SFS Lite

Vegam SFS Lite is an IoT based Smart Manufacturing Platform. Integrated with IoT, vSens (counter, 3 Axis), vApp, vConnect and vIoT, the solution offers plug & play capabilities for any component manufacturer and assembly line. Enables real-time OEE, process visibility, line status, alerts, etc.

Why Vegam SFS Lite

Easy Deployment

- Zero down-time needed
- Ready for use in less than one hour

Operator Friendly

Easy to use. 10 mins training

Multi-Environment Support

Works with Manual, semi automatic, automatic lines

Low Cost of Ownership

Easy maintenance

No Capex

SaaS deployment

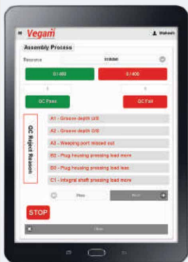

No Additional Infrastructure

No cabling, additional power or networking required

Key Features

Mobile and vSens counter based functionality

- Production count
- Rejection reasons
- Reporting downtimes
- Mobile based configurable alerts & notification

Real-time process/critical parameter recording. Configurable reports for various processes

Manual counter

- Wireless connectivity (WiFi / BLE)
- Quick to install

Vibration based automatic counter

- Wireless connectivity (WiFi / BLE)
- ML/AI based counter
