

## IIoT - Smart Platform Manufacturing Discrete, Injection Mould, Press Tool

### Vegam SFS Lite

Vegam SFS Lite is an IoT based Smart Manufacturing Platform. Integrated with IoT, vSens (counter, 3 Axis), vApp, vConnect and vIoT, the solution offers plug & play capabilities for any component manufacturer and assembly line. Enables real-time OEE, process visibility, line status, alerts, etc.

## Why Vegam SFS Lite

### Easy Deployment

- Zero down-time needed
- Ready for use in less than one hour

### Operator Friendly

Easy to use. 10 mins training

### Multi-Environment Support

Works with Manual, semi automatic, automatic lines

### Low Cost of Ownership

Easy maintenance

### No Capex

SaaS deployment

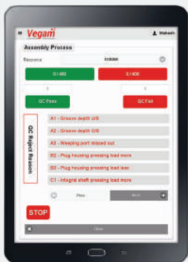

### No Additional Infrastructure

No cabling, additional power or networking required

## Key Features

### Mobile and vSens counter based functionality

- Production count
- Rejection reasons
- Reporting downtimes
- Mobile based configurable alerts & notification

### Real-time process/ critical parameter recording. Configurable reports for various processes

### Manual counter

- Wireless connectivity (WiFi / BLE)
- Quick to install

### Vibration based automatic counter

- Wireless connectivity (WiFi / BLE)
- ML/AI based counter
